QUFORA A/S

Qufora develops medical devices in the field of gastroenterology and urology. We are a Danish product development company (established in 2006) focusing on innovative medical devices, marketed under the Qufora® trademark.

We are in close dialogue with users and professionals to integrate their knowledge and experience in the product development of new innovative products.

The collaboration has enabled us to develop an exciting portfolio of urine bags and accessories, with focus on product quality and ease-of-use for both professionals and users.

QUFORA® LEG BAGS

Qufora® Leg bags are comfortable to wear, having a nice fit to the leg. The bag is almost invisible underneath the clothes when filled and the soft backing ensures high comfort, even in warm conditions.

Qufora® Leg bags are subject to strict quality requirements to meet the expectations of a user-friendly and durable bag.

PRODUCT FEATURES

- ▶ Five different sizes – 500 ml and 750 ml with a multi-chamber system as well as 350 ml, 600 ml, 750 ml and 800 ml without multi-chamber system.
- ▶ Sterile and non-sterile version. Most of the bags have an adjustable tube.
- ▶ Sterile Leg bags are available with needle-free outlet for urine sampling in four sizes.
- ▶ The universal connector makes it easy to connect the Leg bag to a catheter or a male external catheter.
- ▶ The discreet, soft and flexible tube ensures a high degree of freedom of movement.
- ▶ The non-return valve prevents the urine from running back in the tubing, thus preventing infection risk.
- ▶ The multi-chamber system ensures that the Leg bag is almost invisible under clothing, even when full.
- ▶ The back side has a skin-friendly ‘non-woven’ soft backing for increased comfort.
- ▶ Available with either the discrete Q-Flow valve, T-valve or Lever valve - all can be operated single-handed.
- ▶ The drainage valves are easy to operate and can be emptied in a hygienic and safe manner.
- ▶ The Leg bag can be connected directly to a Bed bag. This reduces the risk of infection in the event of rupture between catheter and Leg bag.
- ▶ The Leg bags are individually packaged.

Flexible tube with non-return valve

Holes for attaching velcro strap

Scale and comfortable soft backing on multi chamber bags

Q-flow or T-tap valve, operated with one hand

Connectors - available in two versions - with or without needle-free sampling

NON STERILE

MULTI CHAMBER - DRAINABLE - ADJUSTABLE TUBE / LOOSE CONNECTOR / CAP - SINGLE PACKED

QUFORA® BED BAGS

Qufora® Bed bags are designed for hospitals, nursing homes and home care with focus on functionality and security.

Qufora® Bed bags are available in several versions and sizes to suit individual needs.

PRODUCT FEATURES

- ▶ A wide product assortment. Available in sterile or non-sterile, long or short tubes, drainable and non-drainable and with or without needle-free sampling.
- ▶ Has a universal connector which easily connects to the catheter or Leg bag.
- ▶ The flexible connection tube provides for safe drainage and allows the bag to be placed below bladder level.
- ▶ The non-return valve prevents the urine from running back in the tubing, thus preventing infection risk.
- ▶ Capacity: 750ml, 1.500 ml or 2.000 ml.
- ▶ Two different drainage valves - free-flow T-valves or large Lever valve. The drainage valves are easy to operate.
- ▶ The Bed bag can be emptied in a hygienic and safe way.
- ▶ Clear scale on the outside makes it easy to read the urine volume.
- ▶ The free-flow or large outlet ensures that clots freely can pass.
- ▶ Tube lengths from 10 cm - 130 cm.

“Eyes” for attaching to a bed bag stand

Connectors - available in two versions - with or without needle-free sampling

Both drainage valves are easy to operate with one hand

Non-drainable bag

“Doghouse”

NON STERILE

* no odor filter, bed sheet clip or tube clamp

** closed system: drip chamber; “doghouse”; hook; odor filter; fixation string; bed sheet clip

QUFORA® CATHETER VALVES

The catheter valves can be attached to permanent catheters as an alternative to a urine bag, which provides the user more freedom and discretion.

All valves are easily operated with one hand.

The valves can be connected to Leg and Bed bags.

Single packed. Sterile.

PRODUCT FEATURES

- ▶ The Q-Flow valve has a soft silicone tube and is easy to put together with a urine bag or catheter.
- ▶ The Q-Flow valve is easy to handle with one hand - also for people with reduced hand mobility. The valve secures a free flow of urine at between 90° and 180°. Furthermore, 180° ensures that the valve does not close during the night.

- ▶ T-valve and Lever valve, both equipped with a soft silicone tube and easy to handle with one hand.

QUFORA® VALVES

| REF | Description | Qty/box |
|----------|--------------|---------|
| 21104101 | T-valve | 30 |
| 21104201 | Q-Flow valve | 30 |
| 21104301 | Lever valve | 30 |

QUFORA® ACCESSORIES

Qufora® Accessories are designed for easy and discreet use to give the user greater freedom of movement.

PRODUCT FEATURES

- ▶ Hanger. It is durable and fits all beds and can easily be operated with one hand.
- ▶ Velcro strap for attaching the Leg bag to the leg, so it can be worn discreetly under clothing.
- ▶ The floor stand can be used for both Leg bag and Bed bags. On one side, the floor stand is equipped with one large hook for a water bag and the other side with four small hooks for a bed bag.

At Qufora A/S we know what challenges our users face in everyday life. Thanks to our extensive experience and in-depth product knowledge, we know of the hidden problems and complications that many people think they are the only ones having.

Based on this knowledge, our vision is to create products that are comfortable, safe and easy to handle - but also to break down taboos and build awareness of the area.

For us, it is about adding quality of life and facilitating everyday life for people - both for the caregiver in their daily work in hospitals and other institutions and for the user in his or her everyday life.
